

EGYPTIAN TECHNOLOGY COMPANY

Software platforms. Developed and operated by us.

Tech Station is an Egyptian company working on software development, SaaS architecture and the operation of cloud platforms.

SELF-FUNDED THROUGHOUT OUR JOURNEY

We have relied on our own resources to develop our products and support their operation.

Managely Cloud

MENA SaaS

Business software today. AI projects in development.

WHO WE ARE

Software development. Platform operations.

Tech Station is an Egyptian technology company founded by Ahmed Badawi. Our work covers software development and the infrastructure needed to deliver and operate our platforms.

OUR TECHNICAL FOCUS

01 **SaaS engineering**

Platform architecture, product development and application integration.

02 **Cloud architecture**

Multi-tenant environments and automated platform provisioning.

03 **Business solutions**

Business applications delivered through our own SaaS platform.

04 **Platform operations**

Deployment, infrastructure and the ongoing evolution of software.

OUR FUNDING JOURNEY

Our work. Our own resources.

Tech Station has relied on self-funding throughout its journey. We use our resources to develop our products and support their operation.

This approach shapes how we plan our work, choose development priorities and allocate resources.

Product development

We focus on the features and technical work needed to make our products useful in day-to-day business.

Ongoing operations

Our work continues after launch through operation, maintenance and further development.

Development priorities

We plan development around product needs and the resources available to us.

Our approach: develop the product, operate it, and continue improving it.

BUILT BY TECH STATION

Managely Cloud

A SaaS platform built from the ground up.

Tech Station built Managely Cloud from scratch to launch, operate and manage cloud business solutions.

managely.cloud

PLATFORM CAPABILITIES

Multi-tenant architecture

Customer environments and their operational lifecycle.

Automated provisioning

Preparing and launching cloud business solutions.

Platform operations

The software and infrastructure that operate the service.

Integration and extension

APIs and connected applications across the platform.

ONE OF THE SOLUTIONS DELIVERED THROUGH MANAGELY

Tech Station's own edition of ERPNext

Delivered as a business solution through the Managely SaaS platform.

OUR PORTFOLIO

Current work. Projects in development.

MENA SaaS

Part of the Tech Station portfolio.
